

# COIN HANDLING SOLUTIONS

Willings Services Limited (WSL) working together with NRI. We set the standards that others attempt to follow.

WSL, NRI longest established UK approved service agent, has just completed another three-day training course at NRI's headquarters in Buxtehude, Germany.

The training focused on the repair and service of the red<sup>dot</sup> 2009 award winning high performance Currenza c<sup>2</sup> coin changer, the HENRI setting module and the new heartbeat data file configuration software.

The HENRI setting module can be used to operate, diagnose and configure the Currenza c<sup>2</sup>, G-46.F4xxx, and E-66/A-66 NRI coin changers.

In addition, operational overviews of NRI's payment manager system, cashless payment system the Currenza clip, CashCode note reader, Currenza h<sup>2</sup> hoppers and the extremely fast currenza f<sup>2</sup> validator were provided.

Part of WSL continued success is its investment in staff training and more importantly making sure that training is provided by the original equipment manufactures.

This training was only part of the reasons for WSL's trip to Germany. The other part was to allow NRI the opportunity to capture data from over 350 counterfeit £1 coins that WSL has collected since September 2008, along with 200 provided by the Royal Mint.

The data from these coins will be analyzed by NRI and will enable them where possible to refine existing coin data files and to assist with future developments of new measuring techniques.

This co-operation between NRI and WSL helps demonstrate NRI's philosophy that its customers and service partners are often its best advisers.

NRI and WSL welcome suggestions and comments to help design products that are reliable and as comfortable as possible for the user.

The benefits of NRI development work has been an ever-growing range of products, with improvements incorporated directly from its service partners and customer's suggestions.

If you would like to know more about NRI products or how WSL can help with your coin mechanism repairs than please contact our workshop manager Mr Nigel Port on the number below.

Alternatively you may contact NRI's UK and Overseas Technical Manager Mr Nick Norris on +44 (0)1827 62692.
