

# Pedestrian Revenue Collection Systems

Willings Services Limited (WSL) coin handling expertise, coupled with Automatic Systems (AS) reliable tripod turnstiles and gates, have been combined to create revenue collection access control systems for pedestrian use.

## Basic description

We have designed the systems to provide high security, strong, reliable and user friendly pedestrian access, for both public and private areas.

AS motorised access gates are ideal for local authority public toilets as they do not contravene the 1963 turnstile act.

WSL Revenue Collection Pods (RCP) provide the ideal control where coins, notes or tokens are required for fixed price admission.

The RCP construction and high security locking system with different keys for the cash vault and electronic control compartment, maintain security.

Audit information such as number of operations, cash box total, overpay and a non-resettable grand cash total is available when the cash box is removed.

The audit information can be viewed via a large graphic display, printed on a handheld printer or sent via GSM or RS232/485 network.

## The Advantages at a Glance

- The swing gates do not contravene the 1963 turnstile act.
- Detailed audit information for accountability and prevention of fraud.

Great Yarmouth Borough Council.

The first local authority to use coin operated gates, as a swing gate do not contravene the 1963 turnstile act.

The Conge pictured here was 1 of 4 sites installed in June 1999 and uses an SM320 90° swing gate combined with our high security RCP.

Arriva - Wakefield Bus Station.

June 2001, saw our first pedestrian revenue collection systems using a TR360 bi-directional full height turnstile with a free standing RCP.

St Johns Shopping Centre, Leeds.

October 2002, WSL's first installation of a PMD355 180° swing gate combined with a high security RCP.

The Heritage Centre, Swanage.

TR490 bi-directional fixed arm tripod turnstiles. The turnstiles were originally installed by AS with mechanical coin validators.

However, we replaced the mechanical coin validators with our high security RCP's as they offered multi coin acceptance and enhanced audit information.

Westmorland shopping centre, Kendal.

Two SM320 gates used to create separate entry and exit lanes. The entry gate has been fitted with our high security RCP Type 00003.
